

Feature Story

SMART SITE FOR SAFETY

Safety of workers and sites always comes first in construction projects. Over time, there has been stark advancement in technological application in areas of telecommunications, data analytics, etc., improving project efficiency. Their application in safety enhancement has equally scaled new heights. Common approaches include better monitoring workers' health, reducing physical stress, and keeping workers out of danger.

專題故事

智慧工地保安全

工人和工地的安全，永遠是任何建築工程第一位。隨著時間過去，業界在電信、數據分析等領域的技術應用取得了顯著進步，有效提升工程效率，同時它們在安全方面的應用同樣達到了新的標竿。常見的方法包括，透過引入穿戴式安全設備、事件報告軟件、警報監控系統，以及任務管理軟件，更好地監測工人的健康情況，減輕他們身體壓力，以及使工人遠離危險。
